

RESEARCH

at the University of Applied Sciences
Rottenburg

We conduct research on the sustainable use of our natural resources, e.g.

- Development of new technologies
- Management concepts
- Material development
- Nature conservation
- Tourism

Our research focus areas

- Biomass - logistics and conversion
- Forestry and timber industry - processes, technology, added value
- Management and development of rural areas

Our core competencies

We conduct solution-oriented research!

- Constantly taking up impulses from society and industry as a stimulus for research initiatives
- R & D's mediating function for market-oriented products and processes
- Interdisciplinary teams
- International projects
- Practice-oriented qualification of students
